**DESCRIPTION OF WORK** (from application)

“We are requesting permission to trim some limbs from existing trees which overhang the existing house. The purpose of this work is to minimize the opportunity for squirrels to reach the roof and inhabit the attic. In addition, we would like to remove two trees on the north side of the house which are invading the foundation and causing damage to the existing structure. Neither of these trees were original to the existing property. Thank you for your consideration.”
